

LONDON COLLEGE OF CONTEMPORARY ARTS NEW CAMPUS, NEW HD CCTV SYSTEM

PROJECT FEATURES

Challenge:

To supply and install a CCTV solution during customers two week easter period inclusive of test and commission and handover.

Solution:

Installation of HD fish eye cameras to cover large open areas. Fisheye cameras used to cover areas with minimal blind spots.

Installation of Network switching throughout connecting to a network recorder and Hikcentral client PC for better experience and use for customer.

LCCA reached out to Sonic Security Services to supply and install a new HD IP CCTV system for their new campus in East London.

The CCTV system comprised of HD fisheye cameras across the floors to cover minimal blind spots for health and safety coverage. The use of HikCentral allows the customer best experience with managing their CCTV system with endless features. The fish eye cameras can be de-warped on their CCTV monitors allowing for maximum coverage of site with minimal blind spots assisting in health and safety and management of the site.

Full HD IP CCTV infrastructure was installed along with switching, Network video recorder and Hikcentral client PC with viewing platform on site.

The installation was completed in a professional manner working around other contractors on site and meeting the customer delivery requirements in their easter half term period.
